PLANETA RĂPITĂ

Scenariu: HORIA ARAMĂ

Desene: POMPILIU DUMITRESCU

It wasn't the first time that a celestial body was heading towards Earth. This time the emotion became more intense. The research of the intruder involved the most different means of investigation.
Missile accomplished! The unidentified body was photographed at 28.00 meters!
Seagull here! Seagull here! Y 31 you can return to base...
Quickly, take the film to develop! Be careful!
The photos are excellent! What a curious shape it have!
FANTASTIC!
Indeed, its shape is quite strange for an asteroid. Looks like the asteroid's collision with Earth is inevitable!

revistapatezatoria.blogspot.com

Welcome on Planet Earth!
Hello earthlings!
I say! They talk like us!
Don't be surprised. We learned your language with the help of the automatic translaters
May I?
Here is one of the automatic translaters
First violin

You know of course, that we have certain rights over Earth.
Rights?
We are the oldest inhabitants of the planet.
3875
Here is proof!!
But maybe built recent
Not this one, the first, copied by humans!
...u were not curious enough to look inside?

Hey, what's happening? They want to lift up in the air?
Yes, Runa. They use anti-gravity...
Attention!
Come closer! Don't be afraid!
FANTASTIC!
Unbelievable!
On the ledge, a map of the sky on precious stones with strange inscriptions
Here is my star!
I think our demonstration impressed them.
Follows the next Point!

Antigravity wasn't used to build them
IN MEXIC
What about between Africa and Mexico?
Maybe Atlantis?
Atlantis
Runa- you can't go but the pressure will crash you
Not if you wear this costume Runa

The costume has a 3 hours autonomy. We've been waiting for Runa for 12...
And what do you suggest?
We can't wait for her any more
You are not humans?
We are more: super humans. Not slaves to emotions! We are leaving!
Roy, you must understand!
I knew you were heartless ever since you squeezed that flower
ROY, ROY!
ROY ROY
RUNA!
For our experimental works, grant us this piece from Antarctic
The cosmics have occupied South Pole
"The cosmics" have occupied South Pole...

Great wo... under Anta...'s iceberg!
ROY...
Run...is in your hands!
I know everything about her: we communicate through telepathy!
We'll take you to her!
Roy, I'm so happy to see you...
Now we have them both...
revistaheroezanuri.blogspot.com

Cena: I managed to break the door
I think there must be an exit here somewhere
You still haven't calculated Earth's future trajectory
I'm a specialist in telepathy... the two missing are on the spaceship.
So Roy predicts they are going to "steal" Earth!
They want to move it in their solar system
I'll urgently summon the Secret Board. Earth must defend itself

We definitely oppose to your decision of shifting Earth from the solar system!
What means?
Melt the polar caps! Immediately!
The level of the planetary ocean rises verti
Various parts were wiped off the face of the earth!
These are not humans!
The evacuation was carried out, but not without losses...
Let's hope the evaporation plants will be effective!
We can begin experimenting the underground vehicle
"The Mole" is our only chance...
A. UKMA

we must prevent them from sensing our "Mole" at all costs
The earthlings are jamming us. Our electronic devices are suffering...
They want to disturb our works at the South Pole? Create a shockwave around Antarctica!
"Mole" here "Mole" here I am at the coast of Antarctica!
3 2 1 0!
Here "Mole"... here "Mole". earthquake! The geological layers are breaking... "Mole" is out of danger.
Now we can quietly continue the execution of Earth's population plan.
revistedurezas.blogspot.com

"Mole" is not responding...
Attention! Base! I am getting close to the area indicated! Waiting for orders!
Earth's future trajectory must be finalized immediately
Probably, the "Mole" is here, in the metalliferous layer...
...And the metalliferous layer strongly reflects radio waves!
Attention, "Mole"! Attention, "Mole"!...
...I can hear you!
Still, don't you think that the removal from the solar system will devastate Earth?
For us, it has no importance!!
revistaneagoro.blogspot.com

You have to receive this. It's about them...
The electronic computing machines finally decoded the transmission from Epsilon X3014
"A group of autonomous robots was directed towards the third planet of the yellow sun!!"
"Stop them at all costs!"
Robots
The attackers are robots!... Unbelievable!
Ray was right when he said they are heartless!
Now he's in our hands... Runa too!
We must act with determination!..

"The Mole" arrives near the "cosmics" constructions. Explosives are
been set
We warn you for the last time: leave Antarctica!
This does not worth answering
Here "Mole". Here "Mole". The mission was accomplished!
Just in case, launch a new shockwave around Antarctica.
Explosion!
The "cosmics" work are being invaded by the ocean
The disaster was triggered by themesolves!

revistaquadrinhos.blogspot.com

I'm sorry such a facility was destroyed.
It's in our powers to get it going again
Runa, Roy you can leave the spaceship
With a laser, a hole is being cut into the rocket's body, where Runa and Roy are being prisoners.
In three years, Earth's repulsion plant can be reinstated
We'll use the propulsion plant to correct Earth's axis!
From today, Earth will live an eternal spring!
The END
